

Combating Corona Viruses with Electrostatic Spraying

Commercial Vents Electrostatic Disinfecting Sprayer is designed to provide 100% surround coverage and is ideal for large and small facilities, disinfecting up to 10,000 square feet per hour.

The **Sprayers' technology** provides an electrical charge to disinfectants, allowing them to wrap surfaces with an effective and even coverage. Double-charged particles envelope all surfaces – shadowed, vertical and underneath.

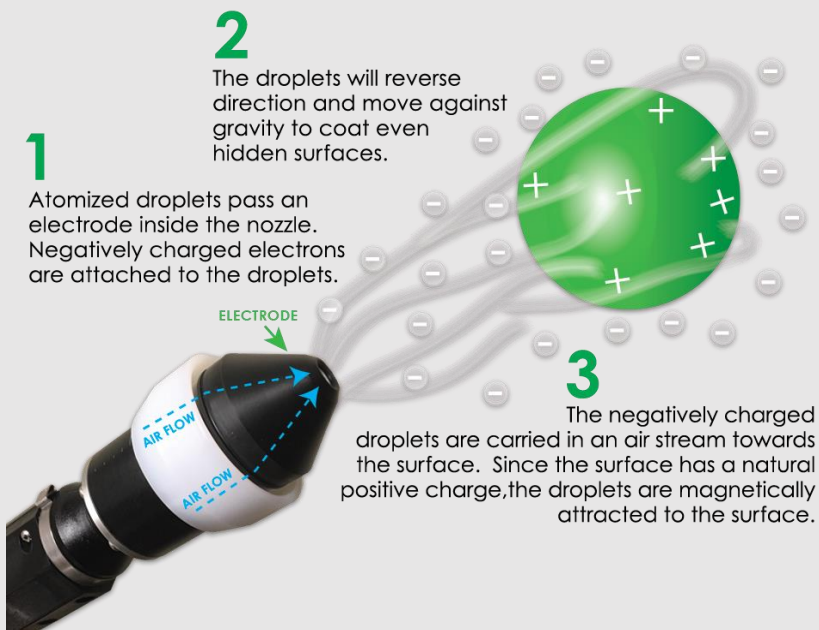

Electrostatic sprayers are far superior to traditional sprayers that deposit based on the direction of spray and the effect of gravity. This results in uneven coverage of disinfectant, which leaves harmful pathogens remaining on surfaces. Spray/wipe methods are time consuming, labour intensive and disinfecting is only as good as the person wiping these surfaces.

More thorough and less \$\$\$ than traditional cleaning methods

Who We Work With:

- ✓ *Healthcare facilities*
- ✓ *Seniors care facilities*
- ✓ *Recreation centres and gyms*
- ✓ *Medical offices*
- ✓ *Offices*
- ✓ *Production facilities*
- ✓ *Construction sites*
- ✓ *Hotels*
- ✓ *Restaurants/food facilities*
- ✓ *Fleet/transportation and more.....*

This Establishment is
Professionally Sanitized
using CFIA approved
Disinfectant.
Independently tested to
kill viruses.
